

CASE STUDY

Hollywood Casino (Toledo)

Energy Solutions for One of the First LEED-Rated Casinos in the US!

The Hollywood Casino, owned by Penn Entertainment, is a premier destination offering over 100,000 SF of world-class gaming, state-of-the-art entertainment, upscale dining, and lively bars. Guests also enjoy seamless access with a 4,000-space multi-level parking garage and an additional 1,000-space surface lot.

Concord Engineering Group was proud to serve as the HVAC Engineer of Record, providing comprehensive MEP/FP engineering services that helped bring this **LEED Silver-certified project** to life.

THE CONCORD DIFFERENCE

- Skilled to meet LEED standards in code-intensive, high-performing environments
- Extensive MEP/FP engineering experience in the gaming/hospitality sector
- Proven track record for excellence in facility systems design engineering including Mechanical/HVAC, Electrical, and more

CONCORD ENGINEERING SOLUTION

- Designed and assisted construction team during the development of a new HVAC system, ensuring alignment with the owner's performance requirements and long-term energy goals.
- Performed energy modeling, measurement and verification for the project.
- Designed energy saving solutions to achieve the LEED Silver rating.
