PROJECT SUMMARY

Rutgers University is in the process of developing a new 5-story facility on the Busch Campus in New Brunswick, NJ. The new 106,210 square foot facility with an estimated budget of \$55 million will seek LEED Silver Certification (or greater) under LEED 2009. The goal of the project is to provide a new state of the art facility to improve the engineering program and to attract the talented prospects for the University. The new Hall of Engineering will be the flagship building for the Rutgers School of Engineering and gateway building to the Busch Campus, housing the school's Department of Civil and Environmental Engineering as well as laboratories and classrooms.

PROJECT HIGHLIGHTS

- Concord Engineering is providing LEED Fundamental and Enhanced Commissioning services.
- The commissioning scope includes: HVAC and building controls, domestic hot water systems, day-lighting and lighting controls, standby generator and automatic transfer switch and main electrical switchgear.
